Introduction

RIZVIZ International Impex carries forward a legacy of technological excellence rooted in **Silmun Inc.**, an IT services company that served international clients from **2010 to 2019**.

RIZVIZ was **established in 2019** to serve local and global markets, delivering innovative solutions in ServiceNow, Artificial Intelligence, Software Development, Web & Application Development, Data Engineering, and DevOps.

Today, RIZVIZ operates through **three branches** in Lahore—Jubilee Town, Johar Town, and Bahria Town—with a workforce of approximately 150–200 professionals at each location, representing a combined team of 450–600 professionals.

Driven by innovation, technical expertise, and a client-centric approach, we empower businesses with scalable, reliable, and future-ready solutions that accelerate growth and digital transformation.

Our Clients

Trusted delivery across technology, cloud, cybersecurity, and government services

Silmun Inc. provides IT staffing, consulting, compliance services, and project delivery solutions, helping businesses **optimize technology, strengthen capabilities**, and improve operational efficiency.

FED CREW Inc. delivers IT, cybersecurity, cloud, and infrastructure solutions, alongside industrial, healthcare, and office supplies to U.S. government agencies and commercial clients.

Hoopoe Labs supplies AI, IT, cloud, and enterprise solutions, alongside hardware and essential products, serving U.S. federal government and commercial clients through government procurement and GSA-related offerings.

Cirrus Systems (FSR Consulting LLC) provides IT hardware, software, cybersecurity, cloud, and technology integration solutions to U.S. federal, state, and local government agencies.

FedPoint Solutions supplies IT hardware, software, office products, industrial supplies, and medical equipment, delivering reliable, cost-effective solutions to government and commercial clients.

iCloud Technologies delivers IT solutions, computer hardware, and technology services to government and commercial clients as a registered U.S. federal contractor.

Jinnah Hospital Lahore: Jinnah Hospital Lahore is a major public-sector teaching hospital providing tertiary healthcare services and medical education. **RIZVIZ contributed** to the hospital's operations through the development of a **Healthcare Suite solution**.

TDCP (Tourism Development Corporation of Punjab): TDCP promotes tourism across Punjab and supports visitor experiences at key destinations. **RIZVIZ developed a ticketing system** to support ticketing operations and improve the visitor experience.

Our Product Portfolio

Technology products designed to simplify work, unlock insight, and support business growth.

01

Intellotrade

Intelligent Trading Solutions

AI-powered trade intelligence for tariffs, HS codes, and global shipping routes. Built for the Pakistan–US trade corridor.

02

SkinClin

Personalized Skin Insights

An AI-powered skin analysis platform providing personalized insights to identify skin concerns and support smarter skin care decisions.

03

Hawk Home Protection

Smarter Home Protection

Hawk Home Protection Warranty covers essential home appliances and systems, helping reduce repair and replacement costs due to normal wear and tear.

VeloGuard Auto

Trusted Auto Protection

VeloGuard Auto Protection prioritizes customer relationships, providing fast, fair warranty claims and exceptional customer service.

05

Alyson Auto

Exceptional Warranty Service

Alyson Auto Warranty delivers fast, fair claims processing and exceptional customer service, building lasting relationships through trusted vehicle protection.

06

Hawk Auto Care

Reliable Vehicle Protection

Hawk Auto Warranty offers vehicle protection plans with free quotes, coverage options, and customer support.

RIZVIZ | A growing portfolio of practical, business-focused technology solutions

Meeting Agenda

Intelligence In Life Insurance

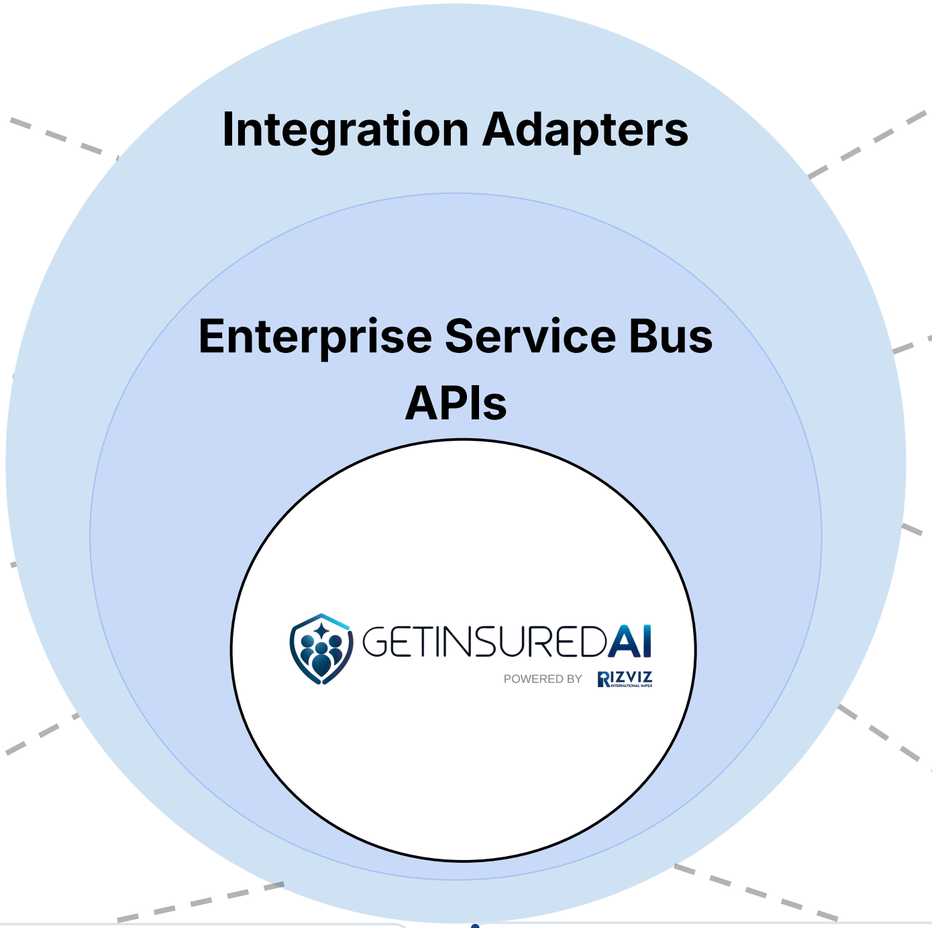

A smarter, more connected approach to insurance operations

We will discuss how AI can **enhance customer experience** through personalized services, **improve accuracy** in risk assessment and underwriting, **accelerate operations** across policy issuance and claims processing, **reduce manual work** through intelligent automation, and **connect every workflow** into a unified insurance ecosystem for greater efficiency and smarter decision-making.

The goal: **Smarter decisions, Smoother Processes, and Better Policy Holder Experiences.**

Integration With Internal & External Systems/Channels

Insurance AI connects through secure APIs and dedicated connectors

Legacy CRM
Connect existing CRMs via APIs or direct integrations

Policy Holders Portal
Integrate with the existing portals of Adamjee Life Insurance

NADRA
Authorized real-time CNIC identity verification, biometric validation, and family tree mapping.

Educational & Govt Authorities
Customer profiles, behavioral history, interaction logs, and relationship intelligence.

Core Insurance System
Direct integration with legacy system and also panel hospitals listing and requirements

Payment Gateways
Payment gateways and also real time connection with Easypaisa, Jazzcash or other Banks

Cellular Service Provider
Integrate with cellular and other service providers for automated insurance services.

Email / Whatsapp Channels
Automated email evidence, policy document generation and omnichannel communication

Medical Facilities
Approved Panel hospitals

Web & Mobile Apps
Role based Website portals with mobile application for easy access

Unified Life Insurance AI Ecosystem

Central AI orchestrating specialized subagents across end-to-end insurance workflow

Lead & Customer Acquisition Co-Pilot
Intelligent lead scoring, qualification, and distribution.

Quotation Plan comparison Co-Pilot
Automated premium calculation and policy benefit comparison.

Document Collection & Validation Co-Pilot
Automated document collection and validation.

OCR & Data Verification Co-Pilot
AI-powered extraction and verification of identity, medical, and financial data.

Medical & Financial Underwriting Co-Pilot
Data-driven risk evaluation and underwriting decision support.

Pre-Policy Compliance Co-Pilot
Automated eligibility screening, risk profiling, and compliance checks.

Post-Policy Issuance, Renewals Co-Pilot
Streamlined policy issuance, customer onboarding, and renewal management.

Claims Processing & Settlement Co-Pilot
Automated claim intake, assessment, validation, and settlement workflows.

Commissions Co-Pilot
Automated commission calculations, agent payouts, and revenue tracking.

Reporting & Dashboard Co-Pilot
Real-time insights into business performance, policy pipelines, and key metrics.

GETINSUREDAI
POWERED BY RIZVIZ

Intelligent Role-Based Workflows

Core Insurance Workflow Journey

Lead & Customer Acquisition

Capture leads, assess customer needs, and assign prospects to agents.

Premium Quotation & Collection

Compare insurance plans, coverage benefits, and premium options.

Document Collection & Validation

Collect CNIC, income proof, medical history, and supporting documents.

OCR & Data Verification

Extract document data, verify details, and flag discrepancies.

Medical & Financial Underwriting

Assess customer risks and determine eligibility and premium rates.

Pre-Policy Compliance & Approval

Verify customer identity, compliance, eligibility, and policy approval.

Policy Issuance, Delivery & Activation

Generate policy documents and activate coverage after approval.

Post-Policy Servicing, Renewals & Claims

Manage policy updates, renewals, and claims settlement.

Commission & Reconciliation

Calculate agent commissions and reconcile premium payments.

AI-Assisted Reports & Dashboard

Generate reports on sales, premiums, claims, and policy performance.

Benefits of AI-Powered Life Insurance

Smarter Decisions. Better Customer Retention. Greater Operational Efficiency.

The opportunity is not to automate more tasks.

It is to make processes more intelligent, decisions more informed, and customer interactions more valuable.

Strategic Advantage

FOR BUSINESS

Better visibility, faster decisions, proactive customer engagement, and opportunities to improve operational efficiency and retention.

FOR IT

An AI capability layer that complements existing architecture, preserves deterministic controls, and creates opportunities to deliver new business capabilities without rebuilding every underlying system.

ADDED ADVANTAGE

Traditional automation executes what we have already defined. AI helps us understand what is happening, identify what deserves attention, and recommend what to do next.

AI-Powered Business Intelligence

From operational pain points to measurable business value

01 BUSINESS PAIN POINTS

Delayed Business Insights
Teams depend on predefined reports and dashboards to understand performance.

Missed Opportunities & Customer Attrition
Early warning signs can remain buried in operational data.

Manual Effort Across Insurance Operations
Teams repeatedly review information, reconcile records, and investigate exceptions.

Rigid, Predefined Business Logic
Traditional workflows handle known scenarios but struggle with ambiguous inputs and unexpected questions.

Complex Integration & Maintenance
Multiple systems, connectors, rules, and reports require ongoing engineering effort.

02 WHAT GetInsuredAI ENABLES

Conversational Intelligence
Ask business questions in natural language and get data-backed answers without waiting for new reports.

Proactive Intelligence
Spot unusual patterns, highlight potential renewal or lapse risks, and prioritize timely intervention.

Intelligent Processing
Interpret documents, summarize cases, identify discrepancies, and recommend next actions.

Context-Aware AI
Understand varied customer requests and business scenarios, providing contextual recommendations within approved controls.

AI-Enabled Orchestration
Connect authorized data, AI capabilities, and controlled execution alongside existing systems.

03 BUSINESS IMPACT

Faster Decisions
Less dependency on reporting queues and predefined dashboards.

Improved Retention
Better renewal opportunities and more proactive customer engagement.

Lower Manual Effort
Reduced repetitive work and faster processing.

Flexible Operations
Greater adaptability without replacing reliable core systems.

Better Technology ROI
Make better use of existing investments, with potential to reduce development effort.

Thank You
